

FIG. 1 is a schematic diagram of a circular structure, possibly a cross-section of a tube or a disk. It features a central circular region labeled 100. Surrounding this center are several concentric layers. The innermost layer is labeled 50. The next layer is labeled 60. The outermost layer is labeled 200. A bracket labeled 30 spans the layers between 60 and 200, indicating a specific region or material. A small cross-section is shown at the top of the structure.
